Education

San Jose State University

Bachelor of Science in Computer Science

Expected Graduation: May 2027

San Jose, CA

- President's Scholar (Spring 2024, Fall 2025) | A.S. Advocacy Award | **GPA: 3.78**
- Courses: Database Management Systems, Data Structures & Algorithms, Advanced Python, Discrete Mathematics, Object-Oriented Paradigms, Operating Systems

Skills

Languages: Python, SQL, Java, C/C++, JavaScript

Data Engineering & Pipelines: ETL, Data Warehousing, Medallion Architecture, Microsoft Fabric, Azure Data Lake (OneLake), Apache Airflow, Redis, Docker

ML & Data Science: Pandas, NumPy, scikit-learn, TensorFlow, Keras, spaCy, NLP, BERT

Databases & Cloud: MySQL, MongoDB, Supabase, AWS (EC2, S3, Lambda)

Analytics & BI: Tableau, Power BI, Excel (Advanced), A/B Testing, Statistical Analysis

Certifications: Machine Learning Foundations (Cornell University), AWS Fundamentals (Coursera)

Experience

RAAPID INC

May 2026 – Jul 2026

Data Engineering Intern

Louisville, KY (Remote)

- Built a **Medallion Architecture** ingestion pipeline in **Microsoft Fabric** (Python, Azure Data Lake / OneLake), landing **5 categories** of hospital PDFs into a Bronze layer with **zero data loss**
- Engineered deduplication and batching utilities (**MD5 hash registry**, 50MB/20-file thresholds) and automated **JSON manifest** generation, enabling idempotent, fully auditable daily ingestion runs
- Implemented fault-tolerant upload logic (**3x retry**, post-upload size verification) and a **dead-letter** system isolating corrupted/zero-byte files into structured logs, improving pipeline reliability

Lucrisma Inc.

May 2025 – Jul 2025

AI Intern

Remote

- Engineered an end-to-end **AI financial assistant** (LangGraph, LangChain, Python, FastAPI) enabling natural-language portfolio queries and reducing recurring support requests
- Designed **RESTful APIs** aggregating data from **12,000+ banks** and **300+ crypto wallets** into a unified portfolio view for 1,000+ users

ContCentric IT Services Pvt Ltd

May 2024 – Aug 2024

Software Developer Intern

Delaware, DE

- Architected a **data annotation pipeline** for **8,000+ drone images** (LabelImg, Python) to train a hazard-detection model
- Fine-tuned a **YOLOv8** object-detection model with data augmentation, driving a **~20%** uplift in hazard-detection accuracy

Projects

NLP Review Classification | *SJSU Undergraduate Research*

Python | **spaCy** | **BERT**

- Built a scalable **NLP pipeline** classifying **25,000 IMDB reviews** at **72% accuracy** using heuristic feature engineering
- Benchmarked results against machine-learning baselines and **BERT** for publication consideration

Warehouse AI | *Website* | *Source Code*

Python (FastAPI) | **React (TypeScript)** | **Redis**

- Engineered a **data-mutation pipeline** (lock → download → mutate → audit → backup → upload) keeping Excel-based inventory data consistent across concurrent writes, backed by Cloudflare R2 and Upstash Redis
- Built an import pipeline with **AI-assisted categorization**, a preview/commit step, and browsable version-history snapshots

VERA | *REFRM (co-founded)*

Python | **LLMs** | **Semantic Search**

- Co-building **VERA**, an AI fashion-discovery platform that ingests a brand's full catalog to power **conversational & visual search**, recommendation/outfit pairing, and demand analytics over product data

Leadership Experience

San Jose State University (Peer Academic Success Coach)

Aug 2026 – Present

- Coach students on coursework, study strategies, and academic skills to help them meet their academic goals

Society of Women Engineers, SJSU (Mentorship Director)

Aug 2025 – Present

- Orchestrated **SWE's mentorship program** for **50+ students** by managing mentee meetings and coordinating events
- Streamlined logistics and content via **Excel**, **Adobe Illustrator**, and **Canva**, boosting **participation by 20%**
